

# Fish Mobile

Because there aren't enough cardboard fish in the world.

## INSTRUCTIONS

*Step 1:* print this template onto a piece of coloured card. You can buy this from art supply shops. Make sure you choose a colour you like! If you want the fish to be different colours I'm afraid you're simply going to have to print this out several times on different coloured sheets.

*Step 2:* cut out the fish shapes with a sharp knife, and use a hole punch (or possibly a scalpel) for the eyes. Then use a large needle to make a hole through the fin, where indicated.

*Step 3:* take some fine cotton thread, and thread it through the fin hole. Tie the end to the main piece of thread, so the fish won't fall off. You can now attach the fish to a coathanger or circular piece of wire, and hang the completed mobile from a lampshade, or something else high enough to ensure you don't bump your head on it.

*Step 4:* admire your handiwork.
